## Re-usable Corrosion Protection

Intercept Technology™ with Buranapa Group Thailand are currently providing re-usable and returnable packaging systems to manufactures with great success. The knock down system with Intercept anti-corrosion protection is the ideal solution for both local and overseas shipments.

Point of contact Ms Nutthapitcha Boonya (FON) Tel: +66 (038) 391-311

## Vietnam distributor Sancopack®

Sancopack® is a Vietnamese company with offices in Hanoi and Ho Chi Minh City, with over 10 years experience providing protective packaging solutions to their clients. Sancopack® provide Intercept Technology™ Anti-corrosion and Static-dissipative industrial packaging for storage, logistics and preservation solutions. Sancopack® has a strong understanding of import and export markets allowing them to provide optimal packaging solutions to local and foreign owned companies.

Point of contact Mr.Pham Quoc Bao

Tel: +84-8-39104532

## Malaysian distributor Gemilang Logistics DP Sdn Bhd

"When you need it", Gemilang Logistics DP Sdn Bhd special project expertise will ensure delivery to site with the correct corrosion protection. Gemilang Logistics is well versed in Project Planning specialising in Oil, Gas, Energy, Petro-chemicals, Industrial and Construction Machinery.

Point of contact Mr. Paul Suresh or Mr. Donald Peter

Tel: +603 5612 8896

## All things Aerospace

Intercept Australia's agent Tufwrap Pty. Ltd. was selected to prepare two Sikorsky 73 A helicopters for sea transport from Australia to Mexico. Exposure to such a harsh ocean environment resulted in Static Intercept® shrink-film being applied over the exterior to protect against corrosion. Desiccant and Corrosion Intercept® Foam was used to preserve the interior, blades and turbines.

Another Intercept Australia's agent Integra Packaging provided preservation for the Australian Defence Force retired Sea King 5 airframes and 500,000 parts for export to United Kingdom. All frames were wrapped using Static Intercept® shrink-film with a second layer UV Stabilised Power shrink. Part specific boxes were lined with Static Intercept® for medium to long term storage. For shorter storage solutions, Intercept 2® was applied.

Intercept Australia provided re-usable Static-Intercept® canvas covers for the shipment and storage of training aircraft engines and Static Intercept® heavy duty woven bags for the front wheel landing gear.

## All things Electronics

### Static Intercept®

A chemically bonded copper-carbon material that delivers both corrosion and static protection in one material:

- Ferrous & non-ferrous metals
- Permanent ESD protection
- Aggressive environments
- Long-term protection
- No outgassing
- Cleanroom compatible
- Recyclable and re-usable

### R.I.B.S. MVTR®

Metal Out ESD protection, corrosion protection, PLUS a superior moisture barrier heavily metallised laminate:

- Ferrous & non-ferrous metals
- Permanent ESD Shielding
- Permanent EMI Shielding
- Full MVTR protection
- Cleanroom compatible
- No outgassing

## All things Outdoors

Intercept re-usable systems allow for :

- On-site inspection
- Rotation of shafts and bearings
- No need to replace the initial packaging
- No hot work required
- Visual of moisture indicator
- Temperature independent
- Long shelf life of product 5 years +
- Recyclable

## All things Offshore

Intercept UK Toorak Limited has successfully preserved the first of 33 sub sea trees shipped to Nigeria. On receiving the trees the customer reported that the delivery was the best in terms of wrapping, crating/ preservation they have seen to date.

Intercept offshore bin covers, a new product line, are tailor made covers that provide corrosion protection during lay down and shipment to offshore platforms.

The lifting gear is exposed so no time is wasted during the lifting procedures.

## I.M.P.S – INTERCEPT™ Mineral Preservation System

Preservation system for Core samples, Chips, Fines and Pulp minerals samples.

Allows for accurate laboratory analyses of the samples extracted from the field through to the laboratory without degradation during shipment and storage.

Replaces costly preservation methods without compromising the sample.

This system will minimise oxidation of the samples, long-term, during sorting, transport and storage. The use of INTERCEPT Technology™ allows substituting costly conservations such as constant freezing and/or wax coating to prevent oxidation. Even if the power fails INTERCEPT keeps working!

## Intercept anti-corrosion systems and packaging

Re-usable canvas film and bags.

Outdoor re-usable allows rotation of shafts and bearings.

Creating systems with corrosion protection. Access to lifting and chain down points on large items without losing the corrosion protection.
